

## INDEX OF TABLES

Table 1: Critical Limb Ischemia Risk Factors	11.
Table 2: 2005-2030 US Prevalence of Diabetes by Selected Age Group in the Population $\geq 18$	17.
Table 3: Summary of Selected Foot Ulcer Classification Systems	23.
Table 4: 2005-2030 U.S. Prevalence of Diabetic Foot Ulcers by Age Group	25.
Table 5: United States Prevalence of Diabetic Foot Ulcer Based on Higher Prevalence in the Elderly	26.
Table 6: 2005-2030 U.S. Incidence of Diabetic Foot Ulcers	27.
Table 7: 2005-2030 U.S. Prevalence of Diabetic Foot Ulcers by Type	29.
Table 8: 2005-2030 U.S. Incidence of Diabetic Foot Ulcers by Type	29.
Table 9: Organisms Present in Diabetic Foot Infections in a Large U.S. Multicenter Clinical Trial	32.
Table 10: 2005-2030 Prevalence of Infected Ischemic and Neuroischemic Diabetic Foot Ulcers	34.
Table 11: 2005-2030 Incidence of Infected Ischemic and Neuroischemic Diabetic Foot Ulcers	35.
Table 12: Eurodiale Classification and Prevalence of Diabetic Foot Ulcers based on Presence/ Absence of Peripheral Artery Disease and Infection	38.
Table 13: 2005-2030 Prevalence of Peripheral Artery Disease in Diabetic Foot Ulcer Patients	39.
Table 14: 2005-2030 Prevalence of Critical Limb Ischemia in Diabetic Foot Ulcer Patients	40.
Table 15: 2005-2030 Incidence of Peripheral Artery Disease and Critical Limb Ischemia in Diabetic Foot Ulcer Patients.	41.
Table 16: Characteristics of Ischemic and Neuroischemic Ulcers	42.
Table 17: Eurodiale Percentage Prevalence of Selected Ulcer and Patient Characteristics based on Presence/Absence of Peripheral Artery Disease and Infection.	43.
Table 18: Locations of Diabetic Foot Ulcers	44.
Table 19: Swedish Cohort Study of Diabetic Foot Ulcer Patients* Morbidity and Mortality of Ischemic Ulcers Compared with Neuropathic Ulcers	46.

Table 20: One-Year Recurrence of Diabetic Foot Ulcers. Percent Recurrence and Annual Incidence of Single Ulcer and Multiple Ulcers.	48.
Table 21: 2005-2030 Incidence of Recurrent Ischemic and Neuroischemic Diabetic Foot Ulcers	48.
Table 22: Critical Limb Ischemia Fontaine and Rutherford Classification Systems	52.
Table 23: 2005-2030 High Case Prevalence of Diabetic Foot Ulcers by Type	55.
Table 24: 2005-2030 High Case Incidence of Diabetic Foot Ulcers by Type	55.
Table 25: 2005-2030 High Case Prevalence of Infected Ischemic and Neuroischemic Diabetic Foot Ulcers	56.
Table 26: 2005-2030 High Case Incidence of Infected Ischemic and Neuroischemic Diabetic Foot Ulcers	56.
Table 27: 2005-2030 High Case Prevalence of Peripheral Artery Disease in Diabetic Foot Ulcer Patients	57.
Table 28: 2005-2030 High Case Prevalence of Critical Limb Ischemia in Diabetic Foot Ulcer Patients	57.
Table 29: 2005-2030: High Case Incidence of Peripheral Artery Disease and Critical Limb Ischemia in Diabetic Foot Ulcer Patients.	58.
Table 30: 2005-2030 High Case Incidence of Recurrent Ischemic and Neuroischemic Diabetic Foot Ulcers	58.

## **INDEX OF FIGURES**

Figure 1: U.S. Population Ages 20 and Older Percent with Diabetes, Prediabetes and Normal Glucose	15.
Figure 2: 1970s to 2009 Percentage of Diagnosed Diabetes in Age 65 and Over	16.
Figure 3: Diabetes as a Percentage of the U.S. Adult Population. Diabetes as a Percent of the U.S. CLI Population	20.
Figure 4: Foot Ulcer Locations	45.
Figure 5: Diabetic Foot Ulcers Comparison of Total Charges and Inpatient Charges by Ulcer Severity	50.
Figure 6: Costs of Treating Diabetic Foot Ulcers in Peripheral Artery Disease Patients versus Patients without Peripheral Artery Disease	51.
