

INDEX OF TABLES

Table 1: Oral Pharmaceuticals in Human Clinical Trials For Treatment of Intermittent Claudication	5.
Table 2: Oral Pharmaceuticals Currently Under Development For Treatment of Intermittent Claudication in Conjunction with Supervised Exercise Training	7.
Table 3: Failed Intermittent Claudication Therapies	8.
Table 4: Oral Thrombin Inhibitors Currently in Clinical Trials for Treatment of Ischemic Events	10.
Table 5: Oral Xa Inhibitors Currently in Clinical Trials for Treatment of Ischemic Events	11.
Table 6: Oral Heparin Formulations Currently in Clinical Trials for Treatment of Ischemic Events	13.
Table 7: Oral Antiplatelets Currently in Clinical Trials For Treatment of Ischemic Events	14.
Table 8: Angiogenesis for Treatment of PAD Published Phase II Results	17.
Table 9: Gene and Protein Therapies to Stimulate Angiogenesis for Treatment of Intermittent Claudication or Critical Limb Ischemia Human Clinical Trials	18.
Table 10: Cell Therapies for the Treatment of Intermittent Claudication or Critical Limb Ischemia United States Company Sponsored Clinical Trials	20.
Table 11: Cell Therapies for the Treatment of Intermittent Claudication or Critical Limb Ischemia United States University Sponsored Clinical Trials	21.
Table 12: Cell Therapies for the Treatment of Intermittent Claudication or Critical Limb Ischemia European Clinical Trials	22.
Table 13: Cell Therapies for the Treatment of Intermittent Claudication or Critical Limb Ischemia Israel and South America	23.
Table 14: Cell Therapies for the Treatment of Intermittent Claudication or Critical Limb Ischemia Far East	24.
