

Table of Contents

SUMMARY AND CONCLUSION	7
INTRODUCTION	10
REDUCTION OF ATHEROTHROMBOSIS FOR CONTINUED HEALTH (REACH) REGISTRY	11
U.S. REACH COHORT	11
Peripheral Artery Disease Prevalence.....	11
Polyvascular Disease in 70% of Peripheral Artery Disease Patients.....	12
One-Year Costs.....	12
Peripheral Artery Disease Patients Had Highest Annual Costs.....	12
Peripheral Artery Disease Procedures Represent 57% of Hospital Costs	13
Fatal Heart Attack, Other Ischemic Events and Bleeding—Highest in Peripheral Artery Disease	13
POLYVASCULAR DISEASE IN PERIPHERAL ARTERY DISEASE PATIENTS	13
Costs Increase with the Number of Vascular Beds Involved	13
Polyvascular Disease Also Increased Costs in Saskatchewan Health Study	14
DISEASE SEVERITY INCREASES COSTS AND VASCULAR HOSPITALIZATION RATES	15
Disease Severity Categories.....	15
Prevalence of Asymptomatic and Symptomatic Disease by Severity	15
HOSPITALIZATION RATES	15
Increase with Disease Severity	15
HOSPITAL COSTS.....	16
Increase with Disease Severity	16
ASYMPTOMATIC PATIENTS.....	17
Almost One-Quarter of Asymptomatic Patients Hospitalized.....	17
Asymptomatic Disease as Costly as Intermittent Claudication	17
CARDIOVASCULAR EVENT RATES	17
Increase with Disease Severity	17
Similar in Asymptomatic and Symptomatic Disease.....	18
Certain Cardiovascular Event Rates Higher in Asymptomatic Patients.....	18
PERIPHERAL ARTERY DISEASE COSTS IN MANAGED CARE	20
Identification of Peripheral Artery Disease Patients.....	20
Prevalence of Peripheral Artery Disease	20
Comorbidities.....	21
TOTAL COSTS	21
Hospital Costs Predominate.....	21
Peripheral Artery Disease-Related Costs Slightly Over 50% of Total Costs	22
Stroke and Heart Attack—Most Common Causes of Hospitalization.....	22
Hospitalizations Unrelated to Peripheral Artery Disease—About Half of the Total....	23
Low Utilization of Risk Factor Reducing Therapies	23
COMPARISON OF HOSPITALIZATIONS IN REACH AND MANAGED CARE POPULATIONS	23
About One-Third Hospitalized at Two Years.....	23
Cause of Hospitalization.....	24

PERIPHERAL ARTERY DISEASE IN SASKATCHEWAN HEALTH STUDY—	
COSTS AND MEDICAL CONSEQUENCES.....	24
Elderly Patients with Serious Comorbidities	25
HOSPITALIZATIONS IN PERIPHERAL ARTERY DISEASE AND HEART ATTACK	
PATIENTS.....	25
About One-Third Hospitalized Annually After Initial Year.....	25
Peripheral Artery Disease Patients—Longer Lengths of Stay.....	26
Peripheral Artery Disease Patients Generally Experienced Higher Rate of	
Cardiovascular Procedures.....	26
TOTAL CARDIOVASCULAR COSTS	27
Peripheral Artery Disease Costs about the Same as Heart Attack.....	27
Majority of Costs Not Related to Peripheral Artery Disease.....	27
CARDIOVASCULAR MORBIDITY AND MORTALITY	28
Morbidity	28
Peripheral Artery Disease Patients—Approximately 50% Mortality at Follow-Up	28
One-Third Experienced Death or Cardiovascular Event at Year Three	28
POLYVASCULAR DISEASE IN SASKATCHEWAN PERIPHERAL ARTERY	
DISEASE PATIENTS	28
Two-Thirds of Saskatchewan Patients Had Peripheral Artery Disease Only.....	28
Polyvascular Disease Increased Hospitalizations	29
Reduced Time to First Hospitalization	29
Higher Mortality	30
MEDICARE COST AND OUTCOMES.....	30
COSTS IN PERIPHERAL ARTERY DISEASE PATIENTS	30
PAD-Related Treatment Costs Are Primarily Inpatient	31
87% of Total Treatment Costs Are Not Peripheral Artery Disease-Related	31
Total 2010 Medicare Peripheral Artery Disease Specific Expenditures	32
2010 Inpatient and Outpatient Peripheral Artery Disease Specific Expenditures	32
2010 Comparison of Medicare Peripheral Artery Disease Spending with Spending on	
Other Selected Health Conditions.....	33
2010 Medicare Expenditures for All-Cause Treatments	33
CLINICAL OUTCOMES AND COSTS.....	34
Important Variables Affecting Cost Comparisons between Jaff and Hirsch Medicare	
Analyses.....	35
Prevalence of PAD.....	35
New Clinical Symptoms	35
Economic Costs	35
HEALTHCARE COST UTILIZATION PROJECT (HCUP) PERIPHERAL ARTERY	
DISEASE INPATIENT COSTS.....	36
Principle Diagnosis Understates Total Costs and Number of Discharges.....	36
U.S. HOSPITAL BILL	36
Medicare and Medicaid Pay the Majority of the U.S. Hospital Bill.....	37
Medicare and Medicaid Discharges Predominate.....	37
PERIPHERAL ARTERY DISEASE DISCHARGES.....	38
Peripheral Artery Disease Patients are Older.....	38
PERIPHERAL ARTERY DISEASE PATIENTS IN MEDICARE AND MEDICAID ..	38

Medicare Billings for Peripheral Artery Disease.....	38
Three-Quarters of PAD Discharges are Medicare and Medicaid Patients	38
HCUP Medicare Bill Compared with Hirsch and Jaff Costs.....	39
PERIPHERAL ARTERY DISEASE COSTS COMPARED WITH ALL PATIENT COSTS	40
PAD Patient Charges Exceed National Average	40
PAD Patient Charges Exceed Average Medicare and Medicaid Charges.....	40
Intermittent Claudication and Critical Limb Ischemia with Gangrene Rank in the Top 100 Medicare Expenditures	41
MEDICARE PERIPHERAL ARTERY DISEASE PATIENT OUTCOMES COMPARED WITH ALL MEDICARE OUTCOMES	41
In-Hospital Outcomes	41
Discharge Status.....	42
COMPARISON OF PERIPHERAL ARTERY DISEASE, CORONARY HEART DISEASE (CHD) AND CEREBROVASCULAR DISEASE (CVD) BILLS.....	43
National Inpatient Bills.....	43
PAD, CHD and CVD Prevalence	43
Average per Patient Charges Similar for PAD, CHD and CVD.....	44
Number of Discharges	44
Peripheral Artery Disease Underdiagnosed and Undertreated	44
Primary Diagnosis Might be Coronary or Cerebrovascular Disease	44
HCUP National Costs Compared with Hirsch and Jaff Medicare Analyses	45
ACUTE MYOCARDIAL INFARCTION, STROKE AND CRITICAL LIMB ISCHEMIA	45
Discharges and National Inpatient Bill.....	45
Average per Patient Charges for Critical Limb Ischemia Exceed Those for Heart Attack.....	46
HIDDEN COSTS—DIABETIC FOOT ULCERS	46
Diabetes Prevalence	46
Diabetic Foot Ulcer Prevalence	46
Incidence	47
Peripheral Artery Disease and Diabetic Foot Ulcer.....	47
Peripheral Artery Disease Prevalence in Diabetic Foot Ulcer Patients	47
Incidence	48
Peripheral Artery Disease Increases the Risk of Developing Diabetic Foot Ulcer	48
Peripheral Artery Disease Associated with Adverse Outcomes	48
Healing Rates, Mortality and Amputation.....	49
ECONOMIC COSTS.....	49
Diagnosed Diabetes	49
Costs of Diabetic Foot Ulcers in Diagnosed and Undiagnosed Diabetes.....	49
Prevalent Ulcers	49
Incident Ulcers	50
Patients with Peripheral Artery Disease More Expensive to Treat.....	50
TOTAL COST COMPARISON OF PERIPHERAL ARTERY DISEASE, CORONARY HEART DISEASE AND CEREBROVASCULAR DISEASE.....	50
Cardiovascular Disease Costs	50

All-Cause Hospitalization Costs	51
ECONOMIC BURDEN INCLUDING HIDDEN COSTS OF DIABETIC FOOT ULCERS	52
APPENDIX A: COST DATA AS ORIGINALLY REPORTED	53
U.S. REACH Costs in 2004 Dollars	53
Margolis Managed Care Study Costs in 2001-2003 Dollars	54
Hirsch Medicare Study Costs in 2001 Dollars.....	54
APPENDIX B: Healthcare Cost and Utilization Project	56
Principle and All-Listed Diagnoses	56
Hospital Charges and Costs	56
APPENDIX C: ICD-9 Diagnosis Codes.....	58
