

**PERIPHERAL ARTERY DISEASE IN AFRICAN AMERICANS:
PREVALENCE, REVIEW OF DISEASE DISPARITIES AND
CAUSES OF THESE DISPARITIES**

**Why Do African Americans Have a Higher Prevalence of PAD and Why is the Disease
More Severe?**

CONCLUSIONS: PREVALENCE OF PERIPHERAL ARTERY DISEASE IN AFRICAN AMERICANS AND PREVALENCE BY DISEASE SEVERITY	8
CONCLUSIONS: AFRICAN AMERICANS EXPERIENCE SIGNIFICANT DISPARITIES IN TREATMENT AND OUTCOMES.....	8
CONCLUSIONS: CAUSES OF DISPARITIES.....	9
Causes are Multifactorial	9
African American Racial Disparities are Gender Disparities	9
Racial Disparities are Socioeconomic Disparities	10
Presence of Microvascular Disease	10
Racial Differences in Genetic Factors	10
Chronic Kidney Disease —A Common Factor in Gender, Microvascular Disease and Genetic Disparities	11
INTRODUCTION.....	12
ESTIMATION METHOD	12
AFRICAN AMERICANS AND PERIPHERAL ARTERY DISEASE.....	12
2019 PREVALENCE OF PERIPHERAL ARTERY DISEASE IN AFRICAN AMERICANS BASED ON PUBLISHED STUDIES	13
Collins—Patients at Primary Care Clinics.....	13
Selvin—National Health and Nutrition Examination Survey 1999-2000	14
The Multi-Ethnic Study of Atherosclerosis	14
Eraso—National Health and Nutrition Examination Survey 1999-2004	14
Prevalence Adjusted to Include Symptomatic Disease.....	14
2019 PREVALENCE OF PERIPHERAL ARTERY DISEASE IN AFRICAN AMERICANS CALCULATED BY THE DIABETES METHOD	15
Conclusions: Two Most Reasonable Diabetes Method Estimates.....	15
Diabetes Method	15
Number of African Americans with Peripheral Artery Disease Estimated by the Diabetes Method Employing Varying Assumptions	16
Methods 1-4 Assumptions	18
Method 1	18
Method 2	18
Method 3	19
Method 4	19
PREVALENCE OF PERIPHERAL ARTERY DISEASE IN AFRICAN AMERICANS 2020-2040.....	19
CRITICAL LIMB ISCHEMIA	20
Higher Prevalence in African Americans	20
African Americans Have Greater Risk	20
PREVALENCE OF CRITICAL LIMB ISCHEMIA IN AFRICAN AMERICANS 2020-2040.....	20
Estimate Assumptions.....	21
Population Ages 65 and Older	21
Population Ages 45-64.....	21
ASYMPTOMATIC/ATYPICAL PERIPHERAL ARTERY DISEASE.....	22
Functional Impairment and Decline.....	22

More Prevalent and More Severe in African Americans	22
Characterized by Poorer Lower Extremity Functioning	23
INTERMITTENT CLAUDICATION	23
An Uncommon Symptom	23
Less Prevalent in African Americans	23
2020-2040 AFRICAN AMERICAN PERIPHERAL ARTERY DISEASE	
PREVALENCE BY DISEASE SEVERITY	23
AFRICAN AMERICANS: DIFFERENCES IN TREATMENTS AND	
OUTCOMES	24
All Peripheral Artery Disease Patients Undertreated for Cardiovascular Risk Factors	24
Undertreatment More Likely in African Americans	25
Higher Risk of Hospitalization	25
African Americans Undergoing Revascularization Have More Risk Factors and Severe	
Comorbidities.....	25
Poorer Limb Outcomes After Revascularization	25
Bypass	25
Endovascular.....	26
Major Amputation More Likely.....	26
Primary Amputation Instead of Revascularization	26
African American Females at Highest Risk of Amputation	27
Lower Mortality After Revascularization	27
AFRICAN AMERICANS: DIFFERENCES IN DISEASE CHARACTERISTICS	27
Similar Prevalence of Multilevel Disease But More Infrapopliteal Disease	27
Similar Prevalence of Isolated Below-the-Knee Disease	28
Poorer Runoff.....	28
More Severe Disease.....	28
WHY DO AFRICAN AMERICANS HAVE A HIGHER PREVALENCE OF	
PERIPHERAL ARTERY DISEASE AND MORE SEVERE ISCHEMIA?	28
Causes are Multifactorial	28
PERIPHERAL ARTERY DISEASE AWARENESS.....	29
Low Disease and Symptom Awareness in the General Population	29
Lowest Awareness in African Americans and Hispanics	29
Lack of Awareness of Previous Diagnosis	29
DISCRIMINATION	29
DIFFERENCES IN PERIPHERAL ARTERY DISEASE RISK FACTORS.....	30
Risk Factors	30
Younger Age of Disease Onset in African Americans	31
African Americans Have a More Adverse Risk Factor Profile	31
Multiple Risk Factors Increase the Risk of Peripheral Artery Disease More in African	
Americans	31
SMOKING AND SMOKELESS TOBACCO	31
High Prevalence in Peripheral Artery Disease Patients	31
Do More African Americans with Peripheral Artery Disease Smoke?	32
Adverse Impact of Smoking on African Americans.....	32
Smokeless Tobacco Use	32

DIABETES	33
Adverse Impact of Diabetes on Peripheral Artery Disease	33
Increases the Risk of Severe Ischemia.....	33
Increases Amputation Risk	33
Elevates Risk of Cardiovascular Events	33
Higher Prevalence in African Americans with Peripheral Artery Disease.....	34
CHRONIC KIDNEY DISEASE	34
Definition	34
Prevalence in Adults	34
Prevalence in Peripheral Artery Disease.....	34
Higher Prevalence in African Americans	35
Chronic Kidney Disease is an Independent Risk Factor for Peripheral Artery Disease.....	35
Chronic Kidney Disease Increases the Risk of Peripheral Artery Disease in	
African Americans	35
Increases Mortality and Amputation.....	35
Presence of Chronic Kidney Disease Combined With Diabetes	35
Risk Factor for Critical Limb ischemia Non-Responders or No-Option Patients	36
End-Stage Renal Disease	36
Lower Survival and Limb Salvage	36
Renal Foot.....	36
African Americans Have Higher Risk and Prevalence of End-Stage Renal Disease ...	36
More Prevalent in African Americans Undergoing Interventional Procedures	37
HYPERTENSION.....	37
African Americans Have the Highest Prevalence.....	37
Most of Peripheral Artery Disease Patients Have Hypertension	37
Adverse Impact on Peripheral Artery Disease.....	37
High Blood Pressure Increases the Risk	37
Low Blood Pressure May Increase Risk.....	38
Higher Prevalence in African American with Peripheral Artery Disease	38
OBESITY.....	38
MICROVASCULAR DISEASE	39
Predicts Development of Peripheral Artery Disease	39
Increases the Risk of Amputation.....	39
African Americans Have More Microvascular Disease and More Severe	
Microvascular Dysfunction.....	39
SOCIOECONOMIC STATUS	40
Definition	40
African Americans—Lower Socioeconomic Status	40
Lower Income	40
Less Educational Attainment	40
Neighborhood or Community Deprivation Concentrated in a Few Zip Codes	40
African Americans More Likely to Reside in Distressed Zip Codes.....	41
Disadvantaged Communities Have a Higher Prevalence of Cardiovascular Risk	
Factors.....	41
African Americans—Higher Prevalence of Cardiovascular Risk Factors and More	
Severe Peripheral Artery Disease	41

Individuals with Low Socioeconomic Status Have More Peripheral Artery Disease and Poorer Outcomes	41
Low Socioeconomic Status Increases the Risk of Amputation	41
Amputation Varies by Zip Code and is Highest in Majority Black Zip Codes	42
GEOGRAPHIC FACTORS.....	42
State and Regional Variations in Vascular Care and Amputation	42
Majority of African Americans Reside in the South	43
Rural Residence Associated with Poorer Health and Outcomes	43
Rural Residence Increases the Risk of Amputation in Nonwhites	43
FEMALE SEX.....	43
Prevalence of Peripheral Artery Disease and Critical Limb Ischemia	43
Gender Differences in Risk Factors	44
Smoking	44
Chronic Kidney Disease	44
Multiple Risk Factors Increase the Risk More in Females	44
Metabolic Syndrome More Prevalent	44
Increases the Risk of Peripheral Artery Disease.....	44
Cardiovascular Risk Factors Undertreated Compared to Men	45
Women Have More Severe Disease	45
More Likely to Present with Critical Limb Ischemia	45
Differences in Lesion Distribution and Morphology	45
Amputation	45
Higher Mortality	45
Socioeconomic Status—Lower Income, More Medicaid Insurance and More Poverty.....	46
Female Residence in Distressed Communities Leads to Poorer Health.....	46
GENDER IS A MAJOR RISK FACTOR IN AFRICAN AMERICANS WITH PERIPHERAL ARTERY DISEASE	46
African American Females Have a Higher Prevalence of Peripheral Artery Disease and More Critical Limb Ischemia.....	46
African Americans Undergoing Revascularization or Amputation More Likely to Be Female	46
Lower Income, More Poverty and Poorer Insurance Coverage.....	47
RACIAL DISPARITIES ARE GENDER DISPARITIES	47
Gender Bias in Peripheral Artery Disease Treatment.....	47
IMPACT OF GENETIC FACTORS ON DISPARITIES IN RISK FACTORS	47
Genetic Variation Defined	48
Single Nucleotide Polymorphisms (SNPs)—Most Common Genetic Variant.....	48
Genetic Factors That Cause Chronic Kidney Disease	48
Apolipoprotein L1 Risk Variants in African Ancestry.....	48
Increase the Risk of Peripheral Artery Disease	49
Sickle Cell Trait	49
Increases Risk of Chronic Kidney Disease.....	49
Genetic Factors That Cause Type 2 Diabetes	49
TCF7L2 Gene—A Powerful Risk Factor for Diabetes.....	50
SNP rs7903146	50

Multiple Type 2 Diabetes Genetic Variants Increase the Risk of Microvascular Disease and Peripheral Artery Disease	51
African Ancestry Increases the Risk of Type 2 Diabetes	51
TCF7L2 Variant—One of the Strongest Risk Factors.....	51
Variants Unique to African Americans.....	51
GENETIC FACTORS ASSOCIATED WITH PERIPHERAL ARTERY DISEASE	52
Family History Independently Increases the Risk of Peripheral Artery Disease.....	52
Genetics of Peripheral Artery Disease—An Emerging Area of Research	52
The Million Veteran Program.....	53
Variants Associated with Polyvascular Disease	53
Variants Specific for Peripheral Artery Disease.....	53
Variants Associated with Peripheral Artery Disease Risk Factors.....	54
Causal Gene Unknown for Some Loci	54
Variants with Significance in the African American Population.....	54
Secreted Modular Calcium-Binding Protein 1 (SMOC1).....	54
Histone Deacetylase 9 (HDAC9).....	55
Chromosome 9p21	55
Locus Encoding the ABO Blood Group	56
RACIAL DIFFERENCES IN SKELETAL MUSCLE TRANSCRIPTIONAL PROGRAMS	56
Potential New Causal Pathway for Critical Limb Ischemia	56
Racial Differences in Genetic Alterations	56
Transcriptomes.....	57
Genetic Alterations in Limb Muscle Tissue of Critical Limb Ischemia Patients	57
Decreased Muscle Mitochondrial Function	57
Similar Alterations in Transcriptomes But Racial Differences in Numbers of Upregulated and Downregulated Genes as well as Specific Genes.....	57
Genetic Alterations in African Americans Differ From Those in Caucasians	58
Genes with Increased Expression	58
Genes with Decreased Expression	58
